

DTE Energy Birdsboro Pipeline Project

About the Project

The Birdsboro Pipeline Project is an approximately 14-mile pipeline in Berks County, Pennsylvania, that will be used to transport natural gas from an interconnection with the Texas Eastern Transmission LP mainline to a new gas-fired electric generating facility in the Borough of Birdsboro, Pennsylvania.

The Birdsboro Facility is being developed by Birdsboro Power LLC. DTE Energy has entered into an agreement with its sole customer, Birdsboro Power, for the full capacity of the pipeline, which is approximately 79,000 dekatherms per day (Dth/d). The project will use 12-inch diameter pipeline.

Federal Energy Regulatory Commission Filings

DTE Midstream Appalachia, a wholly owned subsidiary of DTE Pipeline Company, which is an affiliate of DTE Energy, received approval in October 2016 to initiate the pre-filing process with the Federal Energy Regulatory Commission (FERC) for the Birdsboro Pipeline Project.

DTE submitted the application for a certificate of public convenience and necessity with FERC on May 1, 2017 (FERC Docket Number CP17-409-000). On March 15, 2018 FERC issued a certificate of public convenience to DTE.

Safety

Working together can keep our neighbors, communities and pipelines safe. The Birdsboro Pipeline is committed to working with stakeholders to design, construct and operate the project with a core focus on safety and respect for landowners and natural resources.

We belong to the Interstate Natural Gas Association of America and it is our responsibility to embrace pipeline safety by implementing stringent safety programs and practices every step of the way. Safety is our core value.

Contact Information

Those seeking more information on the project can reach DTE in the following ways:

- Project Development Lead: Kenneth.Magyar@dteenergy.com; Phone (724) 416-7263
- Commercial Lead: Mark.Bering@dteenergy.com; Phone (313) 235-6531
- Community Representative: Steve Rawlings (231) 342-4691
- Media Contact: Jill Wilmot (313) 235-5555
- Website: <https://dtemidstream.com/location/birdsboro-pipeline/>

Project Timeline

October 2016	Initiated FERC pre-filing
Fall/Winter 2016	Project development /public outreach
May 2017	FERC certificate application filed
March 2018	FERC certificate received
March 2018	Anticipated beginning of construction
Q4 2018	Anticipated In-service date
